# 🔁 Task Flows and User Flows

The Plan

Task Flows

User Flows

Task Flows

Task flows show the steps for the completion of a single task. Here are a set of a few features used for this plan:
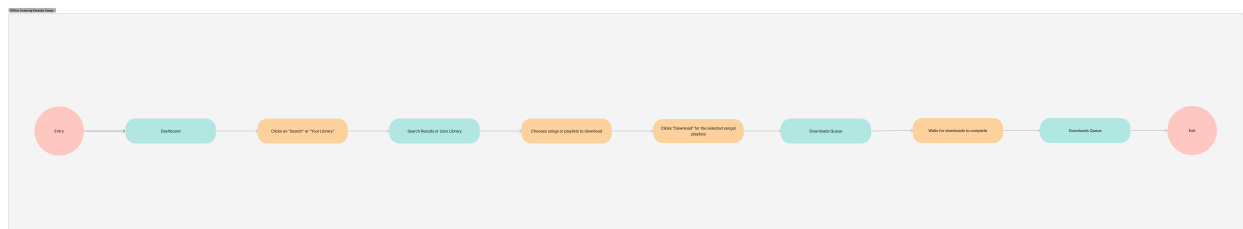

Create and Share Playlist for Karaoke Songs

▼ **Testing the flow of user creating a playlist of karaoke sings interested in singing**

- Can subscribers create this type of playlist easily?
- What is the user participant's overall impression of the product based on this feature?
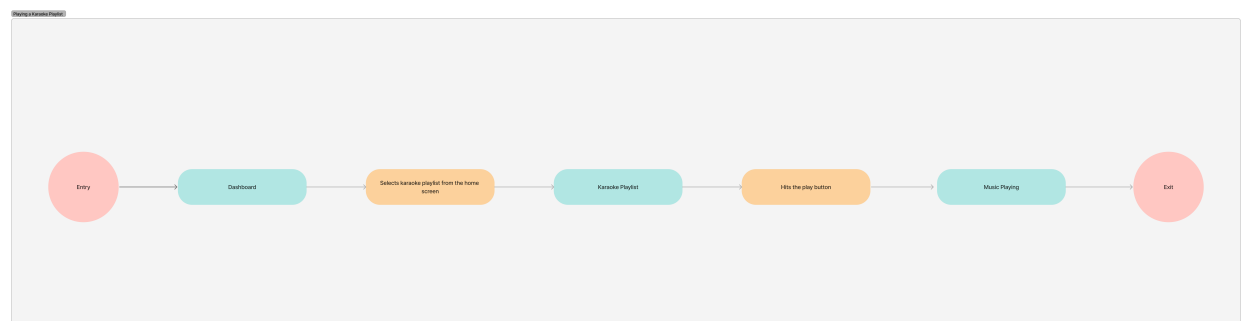

Offline Listening Karaoke Songs

▼ **Testing the flow of how user offline listens to karaoke songs**

- Can subscribers easily download offline songs
- What is the user participant's overall impression of the product based on this feature?

Playing a Karaoke Playlist

▼ **Testing the flow of how a user plays karaoke playlist**

- What is the user participant's overall impression of the product based on this feature?

User Flow

Task flow in which a user persona has discretion in the workflow; it takes into consideration the entire journey while interacting with the product
